Education

RUTGERS UNIVERSITY

School of Arts and Sciences

Bachelors of Science in Computer Science, Bachelor of Arts in Cognitive Science

New Brunswick, NJ

Graduation Date: Spring 2028

- GPA: 3.67
 - Key Courses: Data Structures & Algorithms, Linear Algebra, Discrete Structures I & II, Introduction to Cognitive Science, Computer Architecture, Introduction to Artificial Intelligence, Imaging & Multimedia
-

Technical Skills

- **Programming Languages:** Python, Java, C, C++, Assembly, JavaScript, CSS, HTML
 - **Tools/Technologies:** Git, GitHub, JUnit, Hamcrest, Java Swing
 - **Operating Systems:** Windows, macOS, Linux
-

Experience

Township of Randolph

Revenue Clerk

Randolph, NJ

January 2026-Current

- Maintain/update financial records, account balances, and payment histories with a high degree of accuracy.
- Utilize government financial and payment-processing systems to process transactions and maintain account information.
- Assist residents with tax and utility accounts, answering questions regarding balances, payments, and account status.

Kumon

Center Assistant

Hackettstown, NJ

February 2024 – January 2026

- Tutored students in mathematics and reading from early learners through high school levels.
 - Graded assignments, tracked student progress, provided feedback to improve accuracy and understanding.
 - Assisted with parent communication, front-desk responsibilities, and daily center operations.
-

Projects

Personal Portfolio Website (HTML, CSS, JavaScript)

September 2026

- Designed and developed a responsive portfolio website showcasing projects, technical skills, education, experience, and professional interests.
- Built a cohesive interface using HTML and CSS, incorporating custom layouts, typography, and navigation.
- Applied web design and UX principles to create a clean, personalized interface with interactive project, resume, and contact sections.

Cat Island Simulation (Java)

March 2025

- Developed an object oriented Java simulation using 2D arrays, ArrayLists, and custom classes to model cats navigating a randomly generated island.
- Implemented randomized movement, collision detection, island generation, and turn based logic; built an interactive Java Swing GUI with event listeners and debugging tools.

Linked List Train Car Project (Java)

December 2024

- Designed and implemented a custom doubly linked list data structure to simulate train cars, supporting dynamic insertion, deletion, and traversal operations.
 - Applied principles of data structures, modular design, and debugging with test-driven development (JUnit + Hamcrest).
-

Leadership and Activities

Islamic Society of New Jersey

Volunteer Teacher & Program Assistant

Flanders, NJ

September 2022 – June 2024

- Taught and mentored children in a classroom setting, supporting their learning and engagement.
- Communicated with parents to provide updates and ensure a welcoming, organized environment.
- Coordinated lunch and recess activities, helping maintain safety, smooth transitions, and positive interactions among students.

Rutgers University

September 2024

- Women in Computer Science member (WiCS)
- Muslim Student Association member (MSA)
